

# Worldwide sensation for all hair systems!

(including Lace, Monofilament Net, Polymer, etc.)

## Key Information:

This is not a tape, it is pure bonding glue presented in 'tape format.' It will hold any hair system in place for 4 weeks! In that time you can have the confidence to go for a swim, take showers, play sports, etc.

DO IT YOURSELF! IT'S EASY.....Finally a hair wearer can do their own bondings and save a bundle! No additional liquid is needed. Two strips are normally required for bonding. Cut them down the middle to achieve 3/4"x12" long strips. We also have Mini Bonding Adhesive Tapes as well. An excellent supplement to the long bonding strips. Good for lace hair systems and with polyurethane bases.

## Application Instructions:

- Cut or shave hair (when necessary) in bonding area. Shampoo scalp, then wipe down with 99% alcohol. Scalp must be clean and oil free.
- Apply "breathable Bonding Strip" to clean, dry, oil free hair-system: (see diagram below for pattern).
- Align system and roll from front to back being careful not to crease or fold together. Smart Option: Before applying system to scalp you can lightly mist the hair system with 99% alcohol. This will allow you about 30 seconds to align the system on the head. Allow 3 minutes for the alcohol to dissipate and set up.
- Style as usual. There is no waiting period.

To remove, pull front up and mist with 99% alcohol.

To remove the Bonding Strip from the system, soak in Adhesive Solvent - solution for a few minutes.
